About Me

Full- stack developer with professional experience successfully designing, developing, and supporting live-use applications. I am also experienced in agile development methodologies and have a proven ability to work effectively in cross-functional teams.

Education

University of Sonora

Bachelor's Degree in Computer Science

- **Relevant Coursework:** Data Structures and Algorithms (C++)

May 2017- Dec 2023

Hermosillo, Sonora, México

Experience

Freelancer

Software Developer

May 2022 – May 2025

Hermosillo, Sonora, México

- Migrated legacy jQuery-based applications into responsive, accessible React apps minimizing downtime.
- Developed web applications for various markets, including simple static sites, WordPress templates, and Single Page Applications (SPAs) using technologies like Node, and jQuery.
- Developed a Nutritionists application using React Native, Typescript and AWS with user-friendly interfaces, interactive menus, realtime calories tracking, and payment gateways.

GlobalVoip

Software Developer

May 2023 – Jan 2024

Hermosillo, Sonora, México

- Developed a Power BI dashboard to measure and visualize the ticket resolution process for each engineer, featuring a ranking system that improved visibility and performance tracking.
- Built a demographic analysis dashboard leveraging smart cameras, with Node.js pipelines to transform, clean, and store data, and Power BI to visualize actionable insights.
- Designed a Power BI dashboard for a coffee shop to reduce driver wait times. By integrating data from smart cameras monitoring driver entry and exit, the solution successfully optimized operations and reduced delays.

University of Sonora

Support Technician

Feb 2024 – Feb 2025

Hermosillo, Sonora, México

- Redesigned an internal inventory management application using ASP.NET and SQL to streamline effort tracking on the consumption of infrastructure materials, enhancing the UI for employees, and implemented interactive data visualizations for managers, boosting reporting efficiency by 25%.
- Employed Docker for containerization, enabling consistent development environments and reducing setup time by 40%.

Projects

Hotel Booking System | [Angular, Spring Boot, SQL Server, Docker Demo](#)

- Developed a full-stack hotel booking platform enabling users to search hotels, check availability, make reservations, and process secure payments.

Sahuaro Network | [Angular, Javascript, SASS, Spring Boot, SQL Server, Docker Demo](#)

- Developed a mobile application enabling environmentalist groups in Sonora to track and measure conservation efforts, with progress visualized through dashboards.
- Onboarded 5+ conservation groups, tracking 200+ native plants across 5 projects.
- Reduced manual reporting time by 40% by automating activity logs

Technical Skills

Languages: Java, .NET, Python, TypeScript

Technologies: React.js, Angular, Vue.js, Django, Flask, Spring Boot, Express.js, jQuery, ASP.NET, Node.js, Docker

Cloud : AWS - S3, DynamoDB, EC2, RDS, SNS, SQS — Azure - Cosmos DB, Blob Storage

Concepts: Scrum, Agile Methodology, Cloud Computing, Test-Driven Development (TDD), Microservices
